

Windshield Replacement Aftercare

Thank you for choosing Low Price Auto Glass & Tint. Here's how to care for your new windshield after your appointment, plus what to know about your warranty and camera calibration.

Before you drive home

Before leaving, confirm your safe drive-away time with your technician. Follow the time given for your vehicle and the adhesive used; the care periods below are not a drive-away time.

The first 24–48 hours

Blue 3M tape — Leave in place for 24 hours.

Wind noise can occur while the tape is installed. After the 24-hour period, remove the tape before reporting a wind-noise or leak concern.

If paint peels when the tape is removed, this is considered a paint/finish issue and is not the responsibility of Low Price Auto Glass.

Car washes — Avoid hand car washes for 24 hours and machine car washes for 48 hours.

Pressure release — Keep one side window slightly open (approximately ½ inch) for the first 24 hours.

Warranty coverage

- Lifetime warranty against air and water leaks related to the windshield installation.
- Free chip repairs on windshields replaced by Low Price Auto Glass, provided the chip is quarter-size or smaller.
- A valid receipt is required. All warranty work is performed in-shop only.
- Customer agrees to give Low Price Auto Glass a reasonable opportunity to inspect and resolve any warranty concern.

Chip repair note: Chip repair is intended to help stop damage from spreading. It is not a cosmetic repair, and the chip may remain visible after repair.

ADAS & camera calibration

Many vehicles have Advanced Driver Assistance Systems (ADAS), including Lane Departure Warning and other camera-based safety features.

After windshield replacement, camera calibration may be required by the vehicle manufacturer depending on the vehicle and system.

Low Price Auto Glass performs applicable calibrations in-shop.

If a recommended or required calibration is declined, Low Price Auto Glass is not responsible for error messages or ADAS performance issues resulting from the vehicle being operated without the applicable calibration.

Shop not responsible for

Normal wear and tear · Pre-existing damage · Aftermarket items or accessories
